Product:	Metral® Receptacle T-series		Part Numbers Concerned:	See list attached
Product Manager:	Talee Luo		Issue Date:	Jun, 18 th , 2008
			Page(s):	1/1
Distribution:	Active and Contract Customers			

Subject:

Standardization of performance specification according to Telcordia GR-1217-CORE performance level 5 (CO) using Gold or Palladium Nickel alloy (GXT) as plating materials in the contact area. End of life of non-ROHS Metral Receptacle T-Series.

Nature of Change:

FCI is upgrading its specifications for standard products to common practice in the industry. This strategic move gives FCI the option to supply Metral T-series Receptacles with either Gold or GXT. To strengthen competitive position continuously meeting requirements, FCI will switch to GXT option as preferred plating system globally.

Most customers have converted demand to RoHS-6 for Solder-to-Board applications. Therefore we use this notification to announce withdrawal of lead-containing (RoHS-5) T-series offering.

Implementation Date:

Conversion to GXT will start Sep 16th , 2008
Withdrawal of non-Lead Free (RoHS-5) will be introduced phased.
Per immediate we stop adding non-LF part numbers to the portfolio
Existing part numbers will be phased out after conversion of demand is completed
Last orders on RoHS-5 part number are accepted till Mar 15th 2009
Last shipment date on RoHS-5 part number is Jun 15th 2009.
Stock returns are not being accepted as part of this PCN. Conversion of Soldering applications to RoHS compliant has been timely communicated so that inventory conversion should have been completed

Affected Part Numbers

See enclosed list.

Alternative Products:

- RoHS-6 compliant part numbers converting from Gold to Gold or GXT will not change
- RoHS-5 part numbers (SnPb plating on tail) must convert to full lead-free (RoHS-6). In the part number this is simply identify through addition of suffix "LF".
For example: HM1F41TAP000H6 will become HM1F41TAP000H6LF

Action Required:

Ensure speedy completion of conversion to RoHS-6.
