

OV2680/OV2685 2MP product brief

Cost-Effective, Low-Power 2-Megapixel Sensors for Feature Phones, Smartphones and Tablets

available in
a lead-free
package

The OV2680 (RAW) and OV2685 (SoC) are cost-effective, low-power 2-megapixel CameraChip™ sensors for feature phones and front-facing camera applications in smartphones and tablets. The 1/5-inch sensors leverage a 1.75-micron OmniPixel3-HS™ pixel to deliver high quality 2-megapixel images and video at 30 frames per second (fps). The sensors' high sensitivity and low dark current deliver exceptional image and video quality, even in low-light conditions.

The OV2680 and OV2685 are cost-effective upgrade solutions to the OV2659 & OV2675 CameraChip sensors with a smaller footprint and smaller die size.

Compared to previous generations, the OV2680 and OV2685 offer improved image quality with the latest OmniPixel3-HS pixel architecture. Using OmniVision's proprietary sensor technology, both sensors reduce or eliminate common lighting and electrical sources of image contamination, such as fixed pattern noise, smearing, etc., to produce a clean, stable, color image.

The OV2680 and OV2685 both feature a single-lane MIPI interface, which allows for a simple design with modern basebands.

Applications

- Ultrabooks
- Cellular and Picture Phones
- PC Multimedia
- Tablets
- Games
- Toys
- Home Entertainment

Product Features

- MIPI and D-PHY specification (contains one clock lane) with a maximum of 750 Mbps data transfer rate
- high sensitivity and low dark current for low-light conditions
- support for output formats:
 - OV2680: 10-bit RAW RGB
 - OV2685: 10-bit RAW RGB, 8-bit YUV
- supports free-running clock and gated clock
- programmable controls for frame rate, mirror and flip, cropping, and windowing
- supports down-sampling and binning mode
- auto black level calibration
- low operating voltage and low power consumption for embedded portable applications
- defect correction capability
- supports horizontal and vertical subsampling
- supports global analog gain

OV2680/OV2685

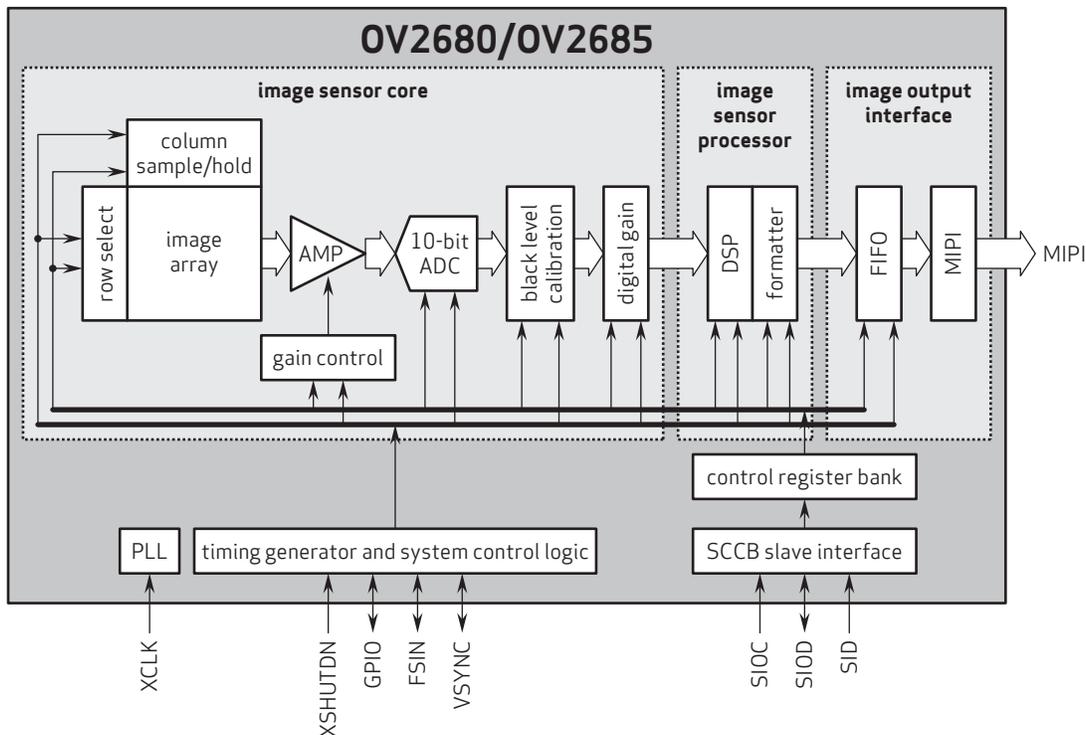

Ordering Information

- **OV02680-H47A**
(color, lead-free, 47-pin CSP5)
- **OV02685-H53A**
(color, lead-free, 53-pin CSP5)

Product Specifications

- **active array size:** 1616 x 1216
- **lens size:** 1/5"
- **power supply:**
 - OV2680 core: 1.58V ±3%
 - OV2685 core: 1.7 - 1.9V
 - analog: 2.6 - 3.0V
 - I/O: 1.7 - 3.0V
- **lens chief ray angle:** 28.5° non-linear
- **input clock frequency:** 6 - 27 MHz
- **maximum image transfer rate:** 30 fps
- **power requirements:**
 - OV2680 active: 123 mW
 - OV2685 active: 259 mW
 - XSHUTDOWN: <1 µA
- **scan mode:** progressive
- **maximum exposure interval:** 1 frame - 4 t_{row}
- **temperature range:**
 - operating: -30°C to +85°C junction temperature
 - stable image: 0°C to +50°C junction temperature
- **pixel size:** 1.75 µm x 1.75 µm
- **image area:** 2840 µm x 2150 µm
- **output formats:** 10-bit RGB RAW, 8-bit YUV (OV2685)
- **package/die dimensions:**
 - OV2680 CSP5: 4180 µm x 3480 µm
 - OV2685 CSP5: 4454 µm x 4014 µm
